

PROTECT

Backup as a Service

without fear

cloud42.com.au/protect

Reduce business risk with a fully-automated Reliable backup solution

- Only pay for what you protect.

"Cloud42 Protect has been a highly reliable, easy to use backup service that runs automatically every day. This gives me peace of mind knowing that my data, customers data and business are protected."

- John McGiffin,
Digital Experiences

Cloud42™ PROTECT is a 'set and forget' solution that removes the risk of human error and cost of ongoing monitoring from your IT environment. Daily emailed reports keep you informed of your backup status. It's that simple!

EASY INTERFACE

Access your backup nerve centre from anywhere, with any device for easy backup and restoration control. No specific IT skills are required.

SECURE ACCESS

Access to your stored data requires individualised credentials (Our node ID and associated password supports up to 64 characters). Data is encrypted with AES128 - the same algorithm approved for US Government Secret data, so you can be sure that your business remains your business. Essentially, you are in control!

ENTERPRISE-GRADE BASE

Cloud42™ PROTECT uses the latest IBM Tivoli Storage Manager software technology at the heart of our rock-solid, lighter than air solution. There are a number of aspects to securing your data to be aware of when using Cloud42™ PROTECT and we strive to provide the most secure environment for the storage of your data as possible.

+ MANAGED SERVICES

ISW's team of cloud experts will enable your organisation to leverage and manage your cloud environments to ensure you get a solution built for you, with the support you need, when you need it.
